

# Public Participation: Results of Scoping

 Comments regarding refinements to the alternatives  Comments regarding changes to the study process

**Public participation is crucial in developing a transportation system that meets the needs of all Dane County residents.**

More than 120 citizens attended a scoping meeting in April to refine the scope of the Transport 2020 study and to comment on the alternatives being evaluated. While the many comments related to tasks already being undertaken by the study team, public input also contributed to the study in a number of ways, both in refining the study process and in developing the alternatives to be carried forward for further study.

A report summarizing scoping activities and all stakeholder comments is available on the study Web site, [www.transport2020.net](http://www.transport2020.net). Numerous further opportunities for public participation will be provided.
